

# HEATING ELEMENTS for the Rubber Industry

*...Solving heating problems all over the world*

# How good is your heated plate without the right heater?

## Benefits for injection and compression molders:

- Achieve a  $\pm 2^\circ$  F temperature profile across platten  
Engineered heating system to achieve up to  $\pm 2^\circ$  F temperature variation under working conditions from front to back and side to side with arranged wattages and profiled cartridge heaters.
- Layout of heaters supplied free by Hotset with purchase of heating elements
- Reduce cycle times up to 20%

"We reduced our cycle time 15% using Hotset's engineering service and specifically designed heaters."  
*Carl Shaffer, Process Engineer, Allied Baltic Rubber, Strasburg, Ohio*

## Various cartridge heaters to meet your special design needs

- Best return on investment in the industry
- Quick delivery on all products at reduced costs
- Special stock arrangement based on your requirements

## Cartridge heater with proven wattage distribution profile

- Enhance performance
- Reduce scrap
- Increase profits
- Reduce maintenance costs
- Increase production

# *Hotset has a complete line of electrical heating elements and products to service any industry.*
